Isn't every day interesting?

Hope you're feeling better - have a nice weekend!
Jennie

The Pennsylvania Liaison received a request from Congressman Marino's office for the data from the first week of sampling in Dimock. When it was shared that the data would be redacted (names and addresses removed), staff requested that the data be provided intact (without redactions). It was explained to staff that we could provide what we would provide under FOIA. Staff seemed to understand, but stated the need for some mechanism to cross-reference results at locations where split samples were taken.

The staff also had questions about 1) whether or not the information would be shared with the public and 2) if water deliveries would be discontinued since no health concerns were found. It was explained that we would like to have 2 rounds of data of certain quality before making decisions on stopping water. Concern was expressed that it was costing taxpayers to continue the deliveries when no health concern was found. It was explained that we would like to have a sense of temporal variations before making a decision on possibly stopping water deliveries.

The Congressman's staff would like to convene a call in the coming week or two with EPA and DEP to discuss what each agency is seeing in the data. It was explained that EPA was in the process of preparing the data for sharing with the Commonwealth and that additional data would be available in the coming weeks. The Congressman's staff would like the call to include Secretary Krancer, Deputy Secretary Perry, and the Congressman for a portion of the call to address both agencies.
